

Fathan Azka Ramadhan

Flutter Developer

Jakarta, Indonesia | fathan.ramadhan@example.com | +62 812-3456-7890 | github.com/fathanazka

Professional Summary

Flutter Developer with 3+ years of experience building and shipping production mobile applications for Android and iOS. Strong command of Dart, Flutter state management, REST API integration, and clean, testable code. Comfortable working in agile teams with Git, GitHub, Firebase, and CI/CD.

Skills

Flutter · Dart · REST APIs · Git · GitHub · Firebase · Provider · Riverpod · Bloc · JSON · Clean Architecture · Widget Testing · CI/CD · SQLite · Figma

Work Experience

Flutter Developer — PT Nusantara Teknologi, Jakarta

Jan 2022 – Present

- Built and shipped 4 production Flutter applications for Android and iOS used by 50k+ monthly active users.
- Implemented state management with Riverpod and Bloc across complex e-commerce and delivery screens.
- Integrated mobile apps with backend REST APIs, handling JSON parsing, caching, and error states.
- Wrote widget and integration tests, raising code coverage from 40% to 80%.
- Set up Firebase Auth, Firestore, and push notifications for two client apps.
- Collaborated with designers and backend engineers using Git and GitHub pull requests.

Junior Mobile Developer — PT Karya Digital, Bandung

Jul 2020 – Dec 2021

- Developed Flutter mobile applications following team coding standards.
- Refactored legacy screens into reusable Dart widgets and improved app performance.
- Fixed bugs reported by QA and monitored app store reviews.

Education

Bachelor of Science in Computer Science — Universitas Indonesia, Depok (2016 – 2020)

Certifications

Google Associate Android Developer Certification

Projects

- ShopEase (Flutter) — e-commerce app with cart, checkout, and payments via REST API.
- MediTrack (Flutter) — health tracking app with offline storage and Firebase sync.
